

Vacuum Hose

VACULITE HOSE

This light weight hose is constructed of polyethylene and wire reinforced to provide abrasion resistance and long life. The rigidity of this hose keeps it from collapsing under high vacuum loads.

Available in 6"-12" Dia. X 25' Long and 4" Dia. X 50' Long with Plastic Helix

FLEXI-FLOW HOSE

This smooth bore hose is constructed of polyvinylchloride and is reinforced with an all plastic helix. Offers great flexibility with tight bending characteristics.

Available in 6" - 8" Dia. X 25' Long

GATOR HOSE

This hose is constructed with a high visibility green wear strip that prevents premature wire wear-through and offers great flexibility due to its extra tough polypropylene construction.

Available in 4" - 12" Dia. X 25' Long

GATOR-FLEX HOSE

This thermoplastic hose is fabric reinforced and offers great wear characteristics with its green wear strip. Storage is easy due to this hose's retractability.

Available in 8" & 10" Dia. X 25' Long

VOLUVENT HOSE

This clear, polyvinyl chloride (pvc) plastic hose is wire reinforced. Highly retractable, very flexible, and sturdy.

Available in 8" - 14" Dia. X 25' Long
