

Rotary Brushing Kit

This spinning brush kit contains everything you will need to power brush ductwork. Attach the cable to your reversible drill and you are ready to work.

Whatever ductwork you're cleaning:

- Metal
- Fiberglass
- Flex

You will clean better & faster with this system than any other system on the market!

Flexible Cleaning Cables These 16' & 23' cables have a solid inner core that allows you to spin the brush in either direction. Chuck the inner core in your reversible cordless drill and you will clean both sides of the duct evenly with complete control. You can even put the two cables together and reach 39' down the main duct.

Whip Brushes for Rectangular Ducts These 8" & 12" brushes have extra long, light strands that "whip" into the corners that plain round brushes miss.

Soft Poly Brushes for Insulated Ducts These 8" & 12" brushes are soft enough to remove the dirt from ductboard or lined ducting without damaging the surfaces. They are also excellent for flex ducting!

Nylon Round Brushes These 8", 12" & 16" brushes are more aggressive for round metal ducting.

Nylon/Metal Brushes These 4" & 6" brushes are perfect for metal dryer ducts. The hard nylon removes most normal build up and the extra strands of metal remove the hardest caked on or rusted materials.

All 9 Brushes
& 2 Cables

Package Price \$599.00

Save \$60.00 from original list price!!
